

POLIFEMO

Clayver 650l

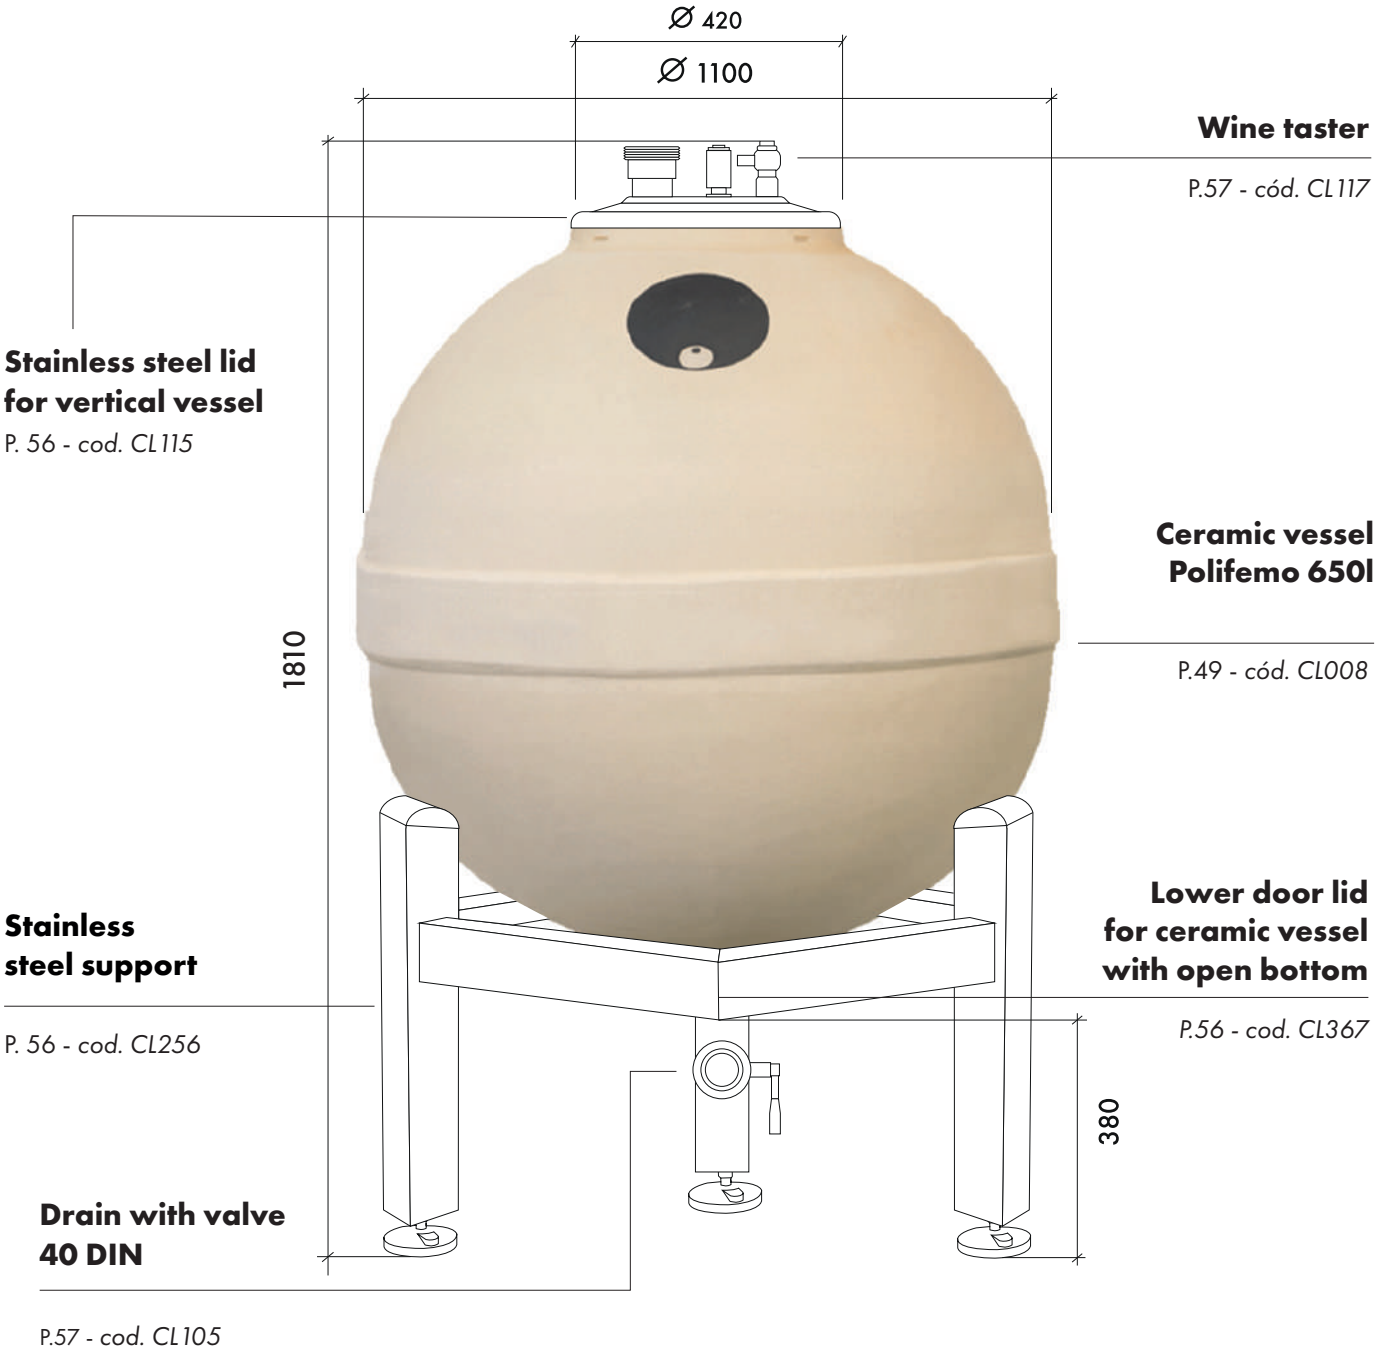

Clayver 650l Polifemo Configurations

Material	Capacity
Clayver Stoneware	650l
Weight	Micro-oxygenation
260kg	O=3mg/l/year
	O+=9mg/l/year

"Polifemo is massive and voluminous. It provides ample capacity while retaining the characteristics of a monolithic Clayver stoneware product, with the lower and upper parts curved so as not to impede convection movements. The top lid is made of stainless steel and comes with an optional tasting tap.

The lower stainless steel door is removable and includes a customized drain valve. This solution allows the bottom of the Clayver to be completely emptied, making it easier to remove skins, clean and sanitise, and includes a three-legged stand and space underneath for the drip tray to be inserted •

CONFIGURATIONS

CERAMIC VESSELS

MODEL CLAYVER POLIFEMO 650I

"Polifemo is both spacious and appealing. It provides ample capacity while retaining the characteristics of the Clayver stoneware vessel, with a curved top and bottom

that do not interfere with convection. The top closure is made of stainless steel and features a tasting tap and a double-flow valve, or a glass bubbler as an option.

- Polifemo 01**
- Vessel 650I cod. CL018 (with open bottom)
 - Stainless steel lid for vertical vessel cod. CL368
 - Two-way valve cod. CL118
 - Stainless steel bung 1/2 gas male cod. CL333
 - Stainless steel support cod. CL256
 - Lower door for vessel type I (with open bottom) cod. CL367
 - Stainless steel elbow 90° DIN40 cod. CL311
 - Stainless steel valve DIN40cod. CL372
